

INDECK[®]

Maintenance-Free Graphite Bearings for Travagrate[®] Stoker Drive and Idler Shafts

IKE'S Carbon-Graphite
Composite Bearings

Indeck Keystone Energy's graphite bearings operate without costly lubrication under extremely heavy loading and are available for both normal and severe temperature applications. The bearings are treated with an oxidation inhibitor to greatly increase their service life and are impregnated with copper to provide strength and durability. The split bearings allow for easy installation.

Features

- Continuous duty at high temperatures
- Extreme heavy load operation
- Maintenance-free self-lubrication
- Reusable ash seal available

Application

These graphite grate bearings may be used as a direct replacement for all new and existing IKE Travagrate[®] stokers and are available for both normal and severe high temperature applications.

Benefits

- Eliminates costly and maintenance intensive forced grease lubrication systems
- Extended service life decreases need for costly down time
- Direct replacement for IKE's existing standard bronze bearings
- In stock for immediate shipment
